

Version 2.1.0 - Workflow PowerBox Release Notes

Version 2.1.0 • Jira Server 7.0.0 - 8.8.0 • Released 2020-04-21

Summary

New Feature: Create Issue on Transition!

Details

We've just introduced two new, great post-functions to Workflow PowerBox:

- [Create Issue on Transition](#)
- [Create Sub-task on Transition](#)

Both of these enable you to create issues or subtasks, based on information provided in transitioned issue. There's also a possibility to create multiple issues at once, based on selected values from Select, Component, and Version multi-select fields.
